- 2000-01** Terranova Arquitectos, Guadalajara, Mexico
- 2000** ARG + CEQ Arquitectos, Guadalajara, Mexico
- 1998-00** Diseño Integral Arquitectónico, Guadalajara, Mexico

## Summary of Experience

Georgina joined the Richard Rogers Partnership in 2003 and was made an Associate when the practice was renamed Rogers Stirk Harbour + Partners in 2007. In 2016 she became an Associate Partner. Her extensive experience ranges from masterplanning and housing to high-rise buildings and airport design.

Georgina was involved in the early stages of the concept design for 3 World Trade Center in New York where her role evolved into team leader for the later stages of the design, coordinating client and consultants. 3 WTC was awarded the American Architecture Award in 2019.

She played a key role in the design coordination and client liaison for the BBVA Bancomer Tower in Mexico City, spending two years in Mexico collaborating directly with the client team and the local partner Legorreta. This was integral to the design development and its implementation on site and in 2018 the project achieved a LEED Platinum certification. It was also awarded the RIBA Award for International Excellence the same year.

The experience she obtained in high-rise design, along with her collaboration in international projects, made her a key participant in Atrio, two high-rise office buildings in Bogotá, Colombia. The first tower was completed in 2020 and the project is already the recipient of LEED Gold certification and 3 Awards of Excellence by the CTBUH. Georgina's initial involvement in the delivery of the facade and structural packages was followed by a more general client liaison and coordination role with the executive architect for the later stages of the design and construction documents.

Georgina has also worked on Taoyuan Airport, Terminal 3 project in Taiwan. Initially, her emphasis was on the masterplanning and design of the Multifunctional Building, a 200,000 m<sup>2</sup> development adjacent to the new terminal building. During 2017-2018, she worked directly with the local architect and consultants through to the final delivery of the Terminal building design.

Georgina is currently responsible for overseeing the design of the 30 Bay Street development in Toronto. The new 60-storey tower, which will be one of Toronto's tallest commercial office buildings, will deliver in excess of 1.4 million square feet of premium AAA class rentable office space in Toronto's downtown area.

## Key Projects

<b>2020</b>	NEOM Sindalah Island Masterplan, Neom, KSA Tencent DCWCampus Competition, Masterplan, Shenzhen, China
